SUMMARY

Full-stack software engineer with 3 years of experience shipping web apps across fintech, real estate, edtech, and SaaS. I work across the whole stack, React and Next.js up front, Node.js, Express, and Postgres in the back. Currently getting into systems programming with Rust. I do best in fast-moving teams where there is real work to own.

EXPERIENCE

Full-Stack Engineer / Altaria *Apr 2026 – Present*

- Revamped a charity platform and e-commerce admin, handling both frontend and backend using Node.js, Express, MongoDB, and Drizzle.
- Designed and built the architecture for a kids tutoring platform using a distributed systems approach, built to handle concurrent sessions across parents, tutors, and students without bottlenecks.

Frontend Engineer / Landscale *Nov 2025 – May 2026*

- Built a Zillow-style real estate app from scratch for the Nigerian market using React and Next.js.
- Owned the full frontend architecture, component systems, and performance from day one.

Frontend Engineer / Influx AI *Nov 2024 – Mar 2025*

- Shipped admin and customer dashboards for a dual-interface SaaS platform using Next.js and Redux Toolkit.
- Cut support requests by 35%, sped up feature delivery by 22%, and lifted checkout conversion by 18%.

Founding Frontend Engineer / Auritrack *Aug 2024 – Dec 2024*

- Led frontend architecture from scratch using React, React Query, Redux, and Tailwind CSS.
- Launched MVP in 6 weeks and improved user onboarding speed by 40%.

Frontend Engineer / The Shawn Exchange *Aug 2023 – Jul 2024*

- Rebuilt customer and admin dashboards for a giftcard/crypto exchange using React, TypeScript, and Recoil.
- Cut load times by 24% and boosted customer satisfaction scores by 25%.

EDUCATION

Doctor of Veterinary Medicine (DVM) *Graduated 2023*

University of Ilorin, Nigeria

SKILLS

Languages JavaScript, TypeScript, Rust, HTML, CSS, SQL, Bash

Frontend React, Next.js, Redux Toolkit, Tailwind CSS, Framer Motion, GSAP, Svelte, Vue

Backend Node.js, Express, Drizzle ORM, Zod, PostgreSQL, MongoDB

Rust Tokio, async/await, ratatui, crossterm

Tools Git, Docker, AWS (S3, Lambda), Turborepo, Supabase, Sanity, Jest, React Testing Library

ADDITIONAL

Spoken Languages: English, Arabic

Availability: Open to remote, full-time roles

Interests : Systems programming, Woodworking.
